Portfolio: <https://prestonford.github.io/>

EDUCATION

Bachelor of Science: Computer Science

Brigham Young University

- GPA 3.92 (Major: 4.0)

Apr 2027

Provo, UT

EXPERIENCE

Web Developer

Brigham Young University

May 2024 - Present

Provo, UT

- Develop features for LearningSuite, the university's learning platform used by over 37,000 students
- Proposed and led a full migration of the legacy build system to Vite, converting thousands of files to ES Modules and greatly improving performance:
 - Compile time sped up by **2.55x**
 - Unit test pipeline sped up by **3.74x**
- Propose and lead a migration of the entire frontend from Vue 2 to Vue 3
- Build core instructor-facing tools including assignment builders, exam question editors, grading dashboards, and discussion forum management using JavaScript, Vue, PHP, and MySQL

Software Engineering Intern

Lucid Software

May 2026 – Aug 2026

South Jordan, UT

- Designed and implemented configurable IP allowlisting in Scala for Lucid's REST API, an enterprise customer request, letting organizations restrict API access to trusted IP ranges
- Redesigned user-search flows in Angular/TypeScript, adding autocomplete and smart recommendations so users can find collaborators without knowing exact names or emails

Web Programming Teaching Assistant

Brigham Young University

Jan 2024 - Apr 2024

Provo, UT

- Mentored students one-on-one in full-stack web development (HTML/CSS, JavaScript, React, AWS, MongoDB) and graded hundreds of assignments

Technical Help Desk Intern

SolvereOne

May 2022 - Jul 2022

Dulles, VA

- Provided time-sensitive IT services for U.S. House of Representatives and dozens of private companies

SKILLS

- Languages:** JavaScript, TypeScript, C#, Java, Scala, PHP, Python, SQL
- Frameworks & Libraries:** React, Vue.js, Angular, ASP.NET, TailwindCSS
- Databases & Cloud:** MySQL, PostgreSQL, MongoDB, AWS (Lambda, DynamoDB, SQS)

PROJECTS

Gig Glide: <https://github.com/prestonford/byu-cs-homecoming-hackathon-2026>

- BYU Hackathon 2026 Best Use of AI 3rd Place
- A swipe-based job-search app that ranks job postings with local sentence embeddings and an online logistic-regression model retrained on every swipe. Helps users tailor resumes with per-job skill analysis

HTTP Cache Parser: <https://github.com/prestonford/http-cache-parser>

- A Node.js tool that inspects browser and game-client HTTP caches and previews extensionless image and audio assets by detecting file signatures, stripping embedded HTTP headers, and handling variable-byte signatures

Collaborative Taskboard Website: <https://github.com/prestonford/collaborate>

- Multi-user project management app. Features include task labeling, rich text editing, drag-and-drop stage transitions, and resource sharing among users. Built with React, TypeScript, TailwindCSS, and ASP.NET

.NET Music Player App: <https://github.com/prestonford/AudioPlayerWPF>

- A Windows desktop audio player in .NET with playlist support, metadata-editing support, user-customizable settings, and file management in a responsive user-friendly interface
