Portfolio: <https://prestonford.github.io/>

EDUCATION

Bachelor of Science: Computer Science

Brigham Young University

- GPA 3.92
- Dean's List Winter 2022

Apr 2027

Provo, UT

EXPERIENCE

Software Engineering Intern

Lucid Software

- Designed and implemented configurable IP allowlisting for Lucid's REST API, letting customers restrict access to trusted IP ranges
- Redesigned user-search UI flows with autocomplete and smart recommendations, streamlining lookup for end users

May 2026 – Aug 2026

South Jordan, UT

Web Developer

Brigham Young University

- Developed LearningSuite, the university's learning platform used by all 34,000 students
- Proposed and led a full migration of the legacy build system to Vite, converting thousands of files to ES Modules and greatly improving performance:
 - Production page load time sped up by **2.59x** ↑
 - Compile time sped up by **2.55x** ↑
 - Unit test pipeline sped up by **3.74x** ↑
- Built core instructor-facing tools including assignment builders, exam question editors, grading dashboards, and discussion forum management

May 2024 - Present

Provo, UT

Web Programming Teaching Assistant

Brigham Young University

- Educated students in a one-on-one setting frequently; graded hundreds of assignments and helped students debug and understand their code to improve their understanding
- Taught full-stack web development topics including HTML/CSS, JavaScript, React, AWS, MongoDB, etc.

Jan 2024 - Apr 2024

Provo, UT

Technical Help Desk Intern

SolvereOne

- Provided IT services for U.S. House of Representatives and dozens of private companies in the area, ensuring productive work environments
- Resolved sensitive technical problems for clients under time pressure, ensuring client satisfaction

May 2022 - Jul 2022

Dulles, VA

SKILLS

- **Languages:** JavaScript, TypeScript, C#, Java, Python, SQL
- **Frameworks & Libraries:** React, Vue.js, ASP.NET, TailwindCSS
- **Databases & Cloud:** MySQL, MongoDB, Amazon Web Services (Lambda, DynamoDB, SQS)

PROJECTS

Collaborative Taskboard Website (in progress): <https://github.com/prestonford/collaborate>

- Building a multi-user Trello-style task management app supporting multiple sharable projects.
- Features include task labeling, rich text editing, drag-and-drop stage transitions, and resource sharing between users. Built with React, Typescript, TailwindCSS, and ASP.NET

Serverless Social Media App: <https://github.com/prestonford/tweeter>

- Developed a cloud-native social media app with AWS Lambda, DynamoDB, and SQS. Implemented user authentication, posting, and timelines with scalable serverless architecture to handle concurrent users

.NET Music Player App: <https://github.com/prestonford/AudioPlayerWPF>

- Built a Windows desktop audio player in .NET with playlist support, metadata-editing support, user-customizable settings, and file management in a responsive user-friendly interface
